

CD95

MULTI RANGE CO₂ ANALYSER

Food processing
Indoor Air Quality
Storage

Multi-Range CO₂ Handheld Analyser

The CD95 unit allows the measurement of carbon dioxide gas over a large range. Units from ppm up to 100% measuring ranges are available. With the ability to add gas pods, the Anagag range is suitable for almost all CO₂ process monitoring and storage applications.

Benefits

- Rugged design
- Flexibility on ranges
- Accurate infra red technology
- Easy user calibration

Features

- CO₂ ranges in % and ppm
- Option for oxygen
- Additional gases can be monitored
- Audible alarms
- Atmospheric pressure

Applications

- CO₂ storage
- Brewing
- Fermentation
